

EDAPPAL, KERALA — WORKING WORLDWIDE
ORBELISSTUDIO.COM

COMPANY PROFILE

Orbelis.

**Websites that work. Assistants
that answer.**

Orbelis is a one-person studio. You work with the person who writes the code.

I work where two things meet: careful, fast front-end work and applied machine learning. Most agencies do one or the other. The useful work is in the overlap: a site that reads clearly, with an assistant behind it that actually knows your business.

My background is in NLP and deep learning, with certifications across Microsoft Azure AI, Google generative AI and IBM data science. I am currently building Dr Evide, a trust-ranked doctor discovery product for Kerala.

BASED

Kerala, India

FOUNDED

2026

TEAM

One, deliberately

TYPICAL BUILD

2 weeks

WHAT I BELIEVE

Most business websites look finished and answer nothing.

A good one loads fast, says it plainly, and replies at 2am.

One person builds yours. No account manager, no template.

Where the time goes.

01

Enquiries go cold after hours

Someone asks at ten at night, gets a reply at eleven the next morning, and has already booked somewhere else.

02

The same ten questions, answered by hand

Timings, fees, eligibility, delivery. Typed out again by whoever happens to pick up the phone.

03

Work that lives in copy and paste

A form, a spreadsheet, a WhatsApp group and an invoice tool, held together by a person retyping between them.

SERVICES AT A GLANCE

01	BUILD	Brand & landing sites	₹40k — ₹70k
02	BUILD	Full sites & booking	₹80k — ₹1.5L
03	RUN	AI assistant layer	+ ₹25k setup
04	RUN	Business automation	From ₹30k setup
05	RUN	Care & retainer	₹5k — ₹15k / month

Prices are in Indian Rupees and exclude any taxes that apply. Every build includes the speed and accessibility checks.

What gets built once.

01

₹40k — ₹70k

Brand & landing sites

One page with one job: making a stranger trust you in the first eight seconds. Clear structure, real typography, and a load time under a second.

- Designed for your brand, not from a template
- Built for phones first
- SEO and analytics set up
- Delivered in two weeks

02

₹80k — ₹1.5L

Full sites & booking

A complete site with the working parts underneath: enquiry forms, appointment requests, pages your team can edit themselves, and a dashboard that shows what is working.

- As many pages as the business needs
- Enquiry and booking forms
- Your team edits the content
- Kept fast as it grows

What keeps running afterwards.

03

+ ₹25k setup

AI assistant layer

An assistant that has read your own documents, prices and policies. It answers from them in your voice, shows where each answer came from, and hands over to a person when it should.

- Answers only from your content
- Hands over on WhatsApp
- Malayalam and English
- Updated every month

04

From ₹30k setup

Business automation

The repetitive work between your tools, done without anyone retyping it. Enquiries followed up, leads logged, invoices and approvals moved along, reports compiled. It starts with a short audit of what is worth automating, because most of it is not.

- WhatsApp and lead follow-up
- Invoices, onboarding, approvals
- CRM and spreadsheet sync
- A weekly report of hours saved

05

₹5k — ₹15k / month

Care & retainer

Hosting, uptime, content changes, assistant updates, automation upkeep and a monthly report. The site stays fast and current instead of quietly going stale.

- Managed hosting
- Assistant and automation upkeep
- Content changes
- A monthly report

One enquiry. Start to finish.

01

Enquiry arrives

By form, chat or WhatsApp, at any hour.

02

Assistant answers

From your own documents, in Malayalam or English.

03

Lead is logged

Into your CRM or spreadsheet, with what was asked.

04

Follow-up goes out

On WhatsApp or email, at the right moment. Nobody has to remember.

05

You get the report

Weekly: what came in, what was answered, what still needs a person.

WHO IT IS FOR

Clinics & healthcare

Patients ask the same questions at every hour. The site answers them, and the front desk gets its day back.

- Appointment requests without phone tag
- Reminders sent automatically
- Timings, fees and preparation answered
- Departments and doctors easy to find

Institutions

Admissions season should not mean the office phone ringing all day about eligibility and fees.

- Programme explorer
- Every enquiry logged in one place
- Eligibility and fee questions answered
- Content your staff can edit

Founders

One page that makes a stranger trust you, and a way to catch everyone it convinces.

- A landing site in two weeks
- An assistant that knows the product
- Leads routed to your inbox and CRM
- Analytics you can read

Brands & companies

The work between your tools, taken off the people now doing it by hand.

- Follow-up that never forgets
- Reports that write themselves
- Orders, invoices and approvals moved along
- The tools you already use, connected

Small scope. Fast ship.

01

Scope

I cut the brief to the smallest version that still does the job. Most projects are half the size they first look, and the smaller one ships.

02

Direction

One look, one layout, one voice, agreed with you before any code is written.

03

Build

Built to a speed target, not only a design. It has to be fast on a mid-range phone over 4G before I call it done.

04

Ship & keep

Launch, then a retainer if you want one, to keep it fast, current and answering. A site is something you run, not something you buy once.

HELD TO A NUMBER

<1s

Load target on 4G, on a mid-range phone

2 weeks

Typical delivery, once scope is agreed

1

Person on your project, start to finish

90+

Lighthouse performance target on mobile

Built, not templated.

One live product, two labelled concepts. Nothing here pretends to be a client engagement that was not one.

LIVE · 2026

PRODUCT, ENGINEERING, RANKING DESIGN

Dr Evide

Symptom-to-specialty routing and trust-ranked doctor discovery for Kerala. Doctors are ranked by verified credentials, experience and authentic reviews — never by who paid. The no-paid-ranking rule is enforced by a CI check, not a promise.

CONCEPT · 2026

DESIGN & BUILD CONCEPT

Clinic site + assistant

A demonstration build for multi-specialty clinics: department routing, doctor profiles, appointment requests, and an assistant that answers timings, fees and preparation instructions in Malayalam or English.

REACT

TAILWIND

AI ASSISTANT

CONCEPT · 2026

DESIGN & BUILD CONCEPT

Institution microsite

An admissions microsite for colleges and training institutes — a programme explorer, the campus story, and an assistant that answers eligibility and fee questions before they reach the office phone.

STUDIO

Edappal, Kerala 679576, India

Tell me what the business does and what is slowing it down. You talk to the person who writes the code.
There is no account manager in between.
