

EDAPPAL, KERALA — WORKING WORLDWIDE
ORBELISSTUDIO.COM

COMPANY PROFILE

Orbelis.

**Automate the busywork. Answer
every enquiry.**

One person. No hand-offs.

Orbelis is me. You talk to the person who designs it, builds it and answers when something breaks. I work where three things meet: automation, applied machine learning and careful, fast websites. Most agencies do one of them; the useful work is in the overlap.

My background is in NLP and deep learning, with certifications across Microsoft Azure AI, Google generative AI and IBM data science. I am currently building Dr Evide, a trust-ranked doctor discovery product for Kerala.

BASED	FOUNDED	TEAM	TYPICAL BUILD
Kerala, India	2026	One, deliberately	2 weeks

WHAT I BELIEVE

Most business websites look finished and answer nothing.

A good one replies at 2am and hands the follow-up to automation.

One person builds yours. No account manager, no template.

Enquiries do not wait for office hours.

01

The copy-paste job

A form, a spreadsheet, a WhatsApp group and an invoice tool, held together by someone retyping between them.

02

The late reply

A customer asks at ten at night. You answer at eleven the next morning. By then they have booked somewhere else.

03

The repeated answer

Timings, fees, eligibility, delivery. The same ten questions, typed out again by whoever picks up the phone.

SERVICES AT A GLANCE

01 RUN **Business automation**

02 RUN **AI assistant**

03 BUILD **Full website**

04 BUILD **Landing site**

05 RUN **Care plan**

Every project is quoted to its requirements, before any work starts. Quotes are in Indian Rupees and exclude any taxes that apply.

What keeps running afterwards.

01

QUOTED TO YOUR REQUIREMENTS

Business automation

The repetitive work between your tools, done for you. Follow-ups go out, leads are logged, invoices and approvals move along, and the weekly report writes itself. It starts with a short audit of what is actually worth automating.

- WhatsApp and lead follow-up
- CRM and spreadsheet sync
- Invoices, onboarding, approvals
- A weekly report of hours saved

02

QUOTED TO YOUR REQUIREMENTS

AI assistant

A chat assistant that has read your prices, timings and policies. It answers customers day and night, in your words, and hands over to you when it should.

- Answers only from your content
- Malayalam and English
- Hands over on WhatsApp
- Updated every month

05

QUOTED TO YOUR REQUIREMENTS

Care plan

Hosting, updates and a monthly report, so the site stays fast and current instead of quietly going stale.

- Managed hosting
- Content changes
- Assistant and automation upkeep
- A monthly report

What gets built once.

03

QUOTED TO YOUR REQUIREMENTS

Full website

A complete site that takes bookings and enquiries, with pages your team can edit and a dashboard that shows what is working.

- As many pages as the business needs
- Enquiry and booking forms
- Your team edits the content
- Kept fast as it grows

04

QUOTED TO YOUR REQUIREMENTS

Landing site

One page built to do one thing: turn a stranger into an enquiry. Clear, fast, and live in two weeks.

- Designed for your brand, not from a template
- Built for phones first
- SEO and analytics set up
- Delivered in two weeks

From first message to follow-up, handled.

01

Enquiry arrives

By form, chat or WhatsApp, at any hour.

02

Assistant answers

From your own documents, in Malayalam or English.

03

Lead is logged

Into your CRM or spreadsheet, with what was asked.

04

Follow-up goes out

On WhatsApp or email, at the right moment. Nobody has to remember.

05

You get the report

Weekly: what came in, what was answered, what still needs a person.

WHO IT IS FOR

Brands & companies

The work between your tools, taken off the people now doing it by hand.

- Follow-up that never forgets
- Reports that write themselves
- Orders, invoices and approvals moved along
- The tools you already use, connected

Clinics & healthcare

Patients ask the same questions at every hour. The site answers them, and the front desk gets its day back.

- Appointment requests without phone tag
- Reminders sent automatically
- Timings, fees and preparation answered
- Departments and doctors easy to find

Institutions

Admissions season should not mean the office phone ringing all day about eligibility and fees.

- Programme explorer
- Every enquiry logged in one place
- Eligibility and fee questions answered
- Content your staff can edit

Founders

One page that makes a stranger trust you, and a way to catch everyone it convinces.

- A landing site in two weeks
- An assistant that knows the product
- Leads routed to your inbox and CRM
- Analytics you can read

Two weeks. Four steps.

01

Scope

I cut the brief to the smallest version that still does the job. Most projects are half the size they first look, and the smaller one ships.

02

Direction

One look, one layout, one voice, agreed with you before any code is written.

03

Build

Built to a speed target, not only a design. It has to be fast on a mid-range phone over 4G before I call it done.

04

Ship & keep

Launch, then a care plan if you want one, to keep it fast, current and answering. A site is something you run, not something you buy once.

NUMBERS YOU CAN HOLD ME TO

<1s

Load target on 4G, on a mid-range phone

2 weeks

Typical delivery, once scope is agreed

1

Person on your project, start to finish

90+

Lighthouse performance target on mobile

Proof, labelled honestly.

One live product and two concept builds. A concept is marked as a concept.

LIVE • 2026

PRODUCT, ENGINEERING, RANKING DESIGN

Dr Evide

Symptom-to-specialty routing and trust-ranked doctor discovery for Kerala. Doctors are ranked by verified credentials, experience and authentic reviews — never by who paid. The no-paid-ranking rule is enforced by a CI check, not a promise.

NEXT.JS

CONCEPT • 2026

DESIGN & BUILD CONCEPT

Clinic site + assistant

A demonstration build for multi-specialty clinics: department routing, doctor profiles, appointment requests, and an assistant that answers timings, fees and preparation instructions in Malayalam or English.

REACT

TAILWIND

AI ASSISTANT

CONCEPT • 2026

DESIGN & BUILD CONCEPT

Institution microsite

An admissions microsite for colleges and training institutes — a programme explorer, the campus story, and an assistant that answers eligibility and fee questions before they reach the office phone.

STUDIO

Edappal, Kerala 679576, India

Tell me what the business does and what is slowing it down. You talk to the person who writes the code.
There is no account manager in between.
