EDAPPAL, KERALA — WORKING WORLDWIDE
ORBELISSTUDIO.COM

COMPANY PROFILE

Orbelis.

Solutions built around your business.

THE STUDIO

Founder-led. No hand-offs.

I run Orbelis. You talk to the person who designs it, builds it and answers when something breaks. I build whatever the problem needs: software from a landing page to a SaaS product, AI that answers from your own content, and the automation that takes repetitive work off people. Most agencies do one of these; the useful work is usually in the overlap. The marketing that brings people in is mine too: the ads, the SEO, the social media and the creatives, so a campaign and the page it lands on are built together.

I am a computer science and engineering graduate with a background in NLP and deep learning, and I build web and mobile apps.

BASED	FOUNDED	TEAM	TYPICAL BUILD
Kerala, India	2026	Founder-led	2 weeks

WHAT I BELIEVE

Start with the problem, not the package. Sometimes the answer is an app, sometimes a page, sometimes one automation.

Built around how your business already works, not a template it has to fit into.

You work with the founder directly. No account manager, no template.

THE PROBLEM

Good ideas stuck at “what if”.

01

The idea that stays an idea

An app, a booking system, a better website. You can picture it, but there is no one to build it, so it stays in a notebook.

02

The late reply

A customer asks at ten at night. You answer at eleven the next morning. By then they have booked somewhere else.

03

The work no one should be doing

Retyping between a form, a spreadsheet and WhatsApp. Answering the same ten questions every day. Hours gone, every week.

SERVICES AT A GLANCE

01	BUILD	SaaS & web applications
02	BUILD	Websites & landing pages
03	BUILD	Brand identity & UI/UX
04	RUN	Business automation
05	RUN	AI assistant
06	RUN	Dashboards & analytics
07	RUN	Care plan
08	GROW	Meta & Google ads
09	GROW	SEO
10	GROW	Social media management
11	GROW	Creative design

What gets built once.

01 QUOTED TO YOUR REQUIREMENTS

SaaS & web applications

Software built for your business or your idea: a SaaS product, a customer portal, an internal tool, a mobile app. It starts as a first version real users can try, and is built so it can grow from there.

- An MVP for a startup
- Logins, payments and integrations
- Custom web and mobile apps
- Built to scale, in stages

02 QUOTED TO YOUR REQUIREMENTS

Websites & landing pages

From one landing page that turns a stranger into an enquiry to a complete site that takes bookings. Designed for your brand, not from a template, fast on a phone, and editable by your team.

- One page, or as many as the business needs
- Your team edits the content
- Enquiry and booking forms
- A landing page is live in two weeks

03 QUOTED TO YOUR REQUIREMENTS

Brand identity & UI/UX

How the business looks and how its product feels to use. A logo and a visual identity with rules you can follow, and screens designed so people find what they came for.

- Logo and visual identity
- UI/UX for websites and apps
- Brand guidelines
- Usability review of what you have

What keeps running afterwards.

04 QUOTED TO YOUR REQUIREMENTS

Business automation

The repetitive work between your tools, done for you. Follow-ups go out, leads are logged, invoices and approvals move along, and the weekly report writes itself. It starts with a short audit of what is actually worth automating.

- WhatsApp and lead follow-up
- CRM and spreadsheet sync
- Invoices, onboarding, approvals
- A weekly report of hours saved

05 QUOTED TO YOUR REQUIREMENTS

AI assistant

A chat assistant that has read your prices, timings and policies. It answers customers day and night, in your words, and hands over to you when it should.

- Answers only from your content
- Malayalam and English
- Hands over on WhatsApp
- Updated every month

What keeps running afterwards.

06 QUOTED TO YOUR REQUIREMENTS

Dashboards & analytics

The numbers that run the business, in one place and up to date. I agree with you which figures matter, pull them out of the tools you already use, and put them on a dashboard that updates itself.

- The few numbers that matter, agreed first
- Live dashboards
- Reports sent automatically
- Pulled from your existing tools

07 QUOTED TO YOUR REQUIREMENTS

Care plan

Hosting, updates and a monthly report, so the site stays fast and current instead of quietly going stale.

- Managed hosting
- Content changes
- Assistant and automation upkeep
- A monthly report

What brings people in.

08 QUOTED TO YOUR REQUIREMENTS

Meta & Google ads

Paid campaigns on Instagram, Facebook and Google. Google reaches the people already searching for what you sell; Meta reaches the ones who have not searched yet. I set the campaigns up, trace each enquiry back to the ad it came from, and move the budget to what works.

- Campaign setup and targeting
- Ad copy and creatives
- Tracking from click to enquiry
- A plain monthly report

09 QUOTED TO YOUR REQUIREMENTS

SEO

Being found on Google without paying for every click. I fix what holds the site back, write the pages people actually search for, and set up your Google Business Profile so nearby customers can find you. It builds over months, not days.

- Technical and speed fixes
- Pages for what people search
- Google Business Profile
- A monthly ranking report

What brings people in.

10 QUOTED TO YOUR REQUIREMENTS

Social media management

Your Instagram, Facebook and LinkedIn planned and kept active, so the page looks alive when a customer checks it. The month is agreed in advance, the posts and captions are made for you, and comments and messages get answered.

- A monthly content calendar
- Posts, reels and captions
- Comments and messages handled
- A report on what worked

11 QUOTED TO YOUR REQUIREMENTS

Creative design

The visuals everything else runs on: posters, ad creatives, reels and short videos, made to stop a thumb and still look like your brand.

- Posts and ad creatives
- Reels and short videos
- Motion graphics
- Sized for every platform

ONE EXAMPLE

An enquiry, handled end to end.

01

Enquiry arrives

By form, chat or WhatsApp, at any hour.

02

Assistant answers

From your own documents, in Malayalam or English.

03

Lead is logged

Into your CRM or spreadsheet, with what was asked.

04

Follow-up goes out

On WhatsApp or email, at the right moment. Nobody has to remember.

05

You get the report

Weekly: what came in, what was answered, what still needs a person.

WHO IT IS FOR

Brands & companies

Software built around how you already work, and the busywork between your tools taken off your people.

- Custom apps, portals and internal tools
- Reports that write themselves
- Ads, SEO and social media run for you
- Follow-up that never forgets
- The tools you already use, connected

Clinics & healthcare

Patients ask the same questions at every hour. The site answers them, and the front desk gets its day back.

- Appointment requests without phone tag
- Reminders sent automatically
- Found on Google by patients nearby
- Timings, fees and preparation answered
- Departments and doctors easy to find

Institutions

Admissions season should not mean the office phone ringing all day about eligibility and fees.

- Programme explorer
- Every enquiry logged in one place
- Admission campaigns on Meta
- Eligibility and fee questions answered
- Content your staff can edit

Founders

One page that makes a stranger trust you, and a way to catch everyone it convinces.

- A landing site in two weeks
- An assistant that knows the product
- An MVP or SaaS product, built in stages
- Leads routed to your inbox and CRM
- Analytics you can read

PROCESS

From what if to live, in four steps.

01

Scope

I cut the brief to the smallest version that still does the job. Most projects are half the size they first look, and the smaller one ships.

02

Direction

One look, one layout, one voice, agreed with you before any code is written.

03

Build

Built to a speed target, not only a design. It has to be fast on a mid-range phone over 4G before I call it done.

04

Ship & keep

Launch, then a care plan if you want one, to keep it fast, current and answering. What gets built is something you run, not something you buy once.

NUMBERS YOU CAN HOLD ME TO

<1s

Load target on 4G, on a mid-range phone

2 weeks

Typical delivery, once scope is agreed

0

Account managers between you and the founder

90+

Lighthouse performance target on mobile

WORK

Proof, labelled honestly.

Client work, shown with permission.

CLIENT · 2026 — DESIGN & BUILD

Holytouch

The marketing website for a construction and design firm in Kerala. It presents the firm and its services, and gives a visitor a way to get in touch.

REACT · VITE · TAILWIND · FRAMER MOTION

CLIENT · 2026 — WEBSITE & SEO

Safari Typing Services

The website for a typing and document services centre in Ajman, UAE. I built and launched it, then ran SEO audits. They found that Google had indexed none of its pages, and that a gap in reviews was holding back its Google Maps ranking.

Tell me what the business does and what is slowing it down. You talk to the person who writes the code. There is no account manager in between.
