

EDAPPAL, KERALA — WORKING WORLDWIDE
ORBELISSTUDIO.COM

COMPANY PROFILE

Orbelis.

**Automate the busywork. Answer
every enquiry.**

Founder-led. No hand-offs.

I run Orbelis. You talk to the person who designs it, builds it and answers when something breaks. I work where three things meet: automation, applied machine learning and careful, fast software, from a landing page to a SaaS product. Most agencies do one of them; the useful work is in the overlap. The marketing that brings people in is mine too: the ads, the SEO, the social media and the creatives, so a campaign and the page it lands on are built together.

I am a computer science and engineering graduate with a background in NLP and deep learning, and I build web and mobile apps.

BASED	FOUNDED	TEAM	TYPICAL BUILD
Kerala, India	2026	Founder-led	2 weeks

WHAT I BELIEVE

Most business websites look finished and answer nothing.

A good one replies at 2am and hands the follow-up to automation.

You work with the founder directly. No account manager, no template.

Enquiries do not wait for office hours.

01

The copy-paste job

A form, a spreadsheet, a WhatsApp group and an invoice tool, held together by someone retyping between them.

02

The late reply

A customer asks at ten at night. You answer at eleven the next morning. By then they have booked somewhere else.

03

The repeated answer

Timings, fees, eligibility, delivery. The same ten questions, typed out again by whoever picks up the phone.

03

11

RUN

Care plan

What keeps running afterwards.

01

QUOTED TO YOUR REQUIREMENTS

Business automation

The repetitive work between your tools, done for you. Follow-ups go out, leads are logged, invoices and approvals move along, and the weekly report writes itself. It starts with a short audit of what is actually worth automating.

- WhatsApp and lead follow-up
- CRM and spreadsheet sync
- Invoices, onboarding, approvals
- A weekly report of hours saved

02

QUOTED TO YOUR REQUIREMENTS

AI assistant

A chat assistant that has read your prices, timings and policies. It answers customers day and night, in your words, and hands over to you when it should.

- Answers only from your content
- Malayalam and English
- Hands over on WhatsApp
- Updated every month

What keeps running afterwards.

10

QUOTED TO YOUR REQUIREMENTS

Dashboards & analytics

The numbers that run the business, in one place and up to date. I agree with you which figures matter, pull them out of the tools you already use, and put them on a dashboard that updates itself.

- The few numbers that matter, agreed first
- Reports sent automatically
- Live dashboards
- Pulled from your existing tools

11

QUOTED TO YOUR REQUIREMENTS

Care plan

Hosting, updates and a monthly report, so the site stays fast and current instead of quietly going stale.

- Managed hosting
- Assistant and automation upkeep
- Content changes
- A monthly report

What gets built once.

03

QUOTED TO YOUR REQUIREMENTS

SaaS & web applications

Software built for your business or your idea: a SaaS product, a customer portal, an internal tool, a mobile app. It starts as a first version real users can try, and is built so it can grow from there.

- An MVP for a startup
- Custom web and mobile apps
- Logins, payments and integrations
- Built to scale, in stages

04

QUOTED TO YOUR REQUIREMENTS

Websites & landing pages

From one landing page that turns a stranger into an enquiry to a complete site that takes bookings. Designed for your brand, not from a template, fast on a phone, and editable by your team.

- One page, or as many as the business needs
- Enquiry and booking forms
- Your team edits the content
- A landing page is live in two weeks

05

QUOTED TO YOUR REQUIREMENTS

Brand identity & UI/UX

How the business looks and how its product feels to use. A logo and a visual identity with rules you can follow, and screens designed so people find what they came for.

- Logo and visual identity
- Brand guidelines
- UI/UX for websites and apps
- Usability review of what you have

What brings people in.

06

QUOTED TO YOUR REQUIREMENTS

Meta & Google ads

Paid campaigns on Instagram, Facebook and Google. Google reaches the people already searching for what you sell; Meta reaches the ones who have not searched yet. I set the campaigns up, trace each enquiry back to the ad it came from, and move the budget to what works.

- Campaign setup and targeting
- Ad copy and creatives
- Tracking from click to enquiry
- A plain monthly report

07

QUOTED TO YOUR REQUIREMENTS

SEO

Being found on Google without paying for every click. I fix what holds the site back, write the pages people actually search for, and set up your Google Business Profile so nearby customers can find you. It builds over months, not days.

- Technical and speed fixes
- Pages for what people search
- Google Business Profile
- A monthly ranking report

What brings people in.

08

QUOTED TO YOUR REQUIREMENTS

Social media management

Your Instagram, Facebook and LinkedIn planned and kept active, so the page looks alive when a customer checks it. The month is agreed in advance, the posts and captions are made for you, and comments and messages get answered.

- A monthly content calendar
- Posts, reels and captions
- Comments and messages handled
- A report on what worked

09

QUOTED TO YOUR REQUIREMENTS

Creative design

The visuals everything else runs on: posters, ad creatives, reels and short videos, made to stop a thumb and still look like your brand.

- Posts and ad creatives
- Reels and short videos
- Motion graphics
- Sized for every platform

From first message to follow-up, handled.

01

Enquiry arrives

By form, chat or WhatsApp, at any hour.

02

Assistant answers

From your own documents, in Malayalam or English.

03

Lead is logged

Into your CRM or spreadsheet, with what was asked.

04

Follow-up goes out

On WhatsApp or email, at the right moment. Nobody has to remember.

05

You get the report

Weekly: what came in, what was answered, what still needs a person.

WHO IT IS FOR

Brands & companies

The work between your tools, taken off the people now doing it by hand.

- Follow-up that never forgets
- Reports that write themselves
- Ads, SEO and social media run for you
- Orders, invoices and approvals moved along
- The tools you already use, connected

Clinics & healthcare

Patients ask the same questions at every hour. The site answers them, and the front desk gets its day back.

- Appointment requests without phone tag
- Reminders sent automatically
- Found on Google by patients nearby
- Timings, fees and preparation answered
- Departments and doctors easy to find

Institutions

Admissions season should not mean the office phone ringing all day about eligibility and fees.

- Programme explorer
- Every enquiry logged in one place
- Admission campaigns on Meta and Google
- Eligibility and fee questions answered
- Content your staff can edit

Founders

One page that makes a stranger trust you, and a way to catch everyone it convinces.

- A landing site in two weeks
- An assistant that knows the product
- An MVP or SaaS product, built in stages
- Leads routed to your inbox and CRM
- Analytics you can read

Two weeks. Four steps.

01

Scope

I cut the brief to the smallest version that still does the job. Most projects are half the size they first look, and the smaller one ships.

02

Direction

One look, one layout, one voice, agreed with you before any code is written.

03

Build

Built to a speed target, not only a design. It has to be fast on a mid-range phone over 4G before I call it done.

04

Ship & keep

Launch, then a care plan if you want one, to keep it fast, current and answering. A site is something you run, not something you buy once.

NUMBERS YOU CAN HOLD ME TO

<1s

Load target on 4G, on a mid-range phone

2 weeks

Typical delivery, once scope is agreed

0

Account managers between you and the founder

90+

Lighthouse performance target on mobile

Proof, labelled honestly.

Client work, shown with permission.
